Robotics Process Automation (RPA) for Beginners - Labs

Course code: TGS-2026064721

Each folder is self-contained with a UiPath project, CSV/XLSX mock data, detailed procedure and checklist.

- Lab 1: Assess an RPA Opportunity and Build a First Sequence - A1, A6 | K1, K2, K10
- Lab 2: Model Attended and Unattended Service Automation - A1, A6 | K1, K3, K10
- Lab 3: Route Customer Requests with If and Switch - A2, A3, A4 | K4, K6
- Lab 4: Process a Customer DataTable with Loops - A2, A4 | K4, K6, K11
- Lab 5: Validate and Reconcile Invoices in Excel - A4, A5 | K5, K11
- Lab 6: Extract and Filter a Singapore Schools Table - A1, A4, A5 | K5, K7
- Lab 7: Debug a Failing Order Workflow - A5, A7, A8 | K8
- Lab 8: Build Resilient File Processing with Try Catch - A5, A7, A8 | K8, K13
- Lab 9: Publish and Run a Process with Orchestrator - A7, A8, A9 | K9, K12
- Lab 10: Design and Monitor a Multi-Robot Queue - A1, A2, A3, A4, A5, A7, A8, A9 | K3, K9, K13
