Lab 10 Completion Checklist

[ ] Opened the supplied UiPath project and restored dependencies.

[ ] Inspected both CSV and Excel mock data before editing the workflow.

[ ] Completed the procedure in README.md / the Learner Guide.

[ ] Tested the normal path with the supplied records.

[ ] Tested at least one alternate or exception path.

[ ] Confirmed: Every transaction has a unique reference and final state, retries are bounded, business exceptions are not retried, and the optimisation recommendation cites measured queue evidence.

[ ] Saved: Queue metrics workbook, workflow screenshots and a written scale/retry/review recommendation.

[ ] Removed passwords, access tokens and real personal data from evidence.
